<PUNG KUI SIN>

As a Frontend Web Developer with 3 years of experience, I focus on creating seamless, user-centered web experiences. I'm passionate about clean, efficient code and leveraging technologies like React.js, JavaScript, HTML, and CSS to optimize performance and usability.

PROFESSIONAL EXPERIENCE

Web Developer

Germs Digital

August 2022 - Present

- Develop and implement features for new and existing web applications using technologies such as React.js, jQuery, JavaScript, Bootstrap, and PHP.
- Build interactive browser games for various campaigns, focusing on user engagement and responsive design.

Webmaster

Webscape Consulting

Oct 2018 - June 2022

- Handled website development and regular BAU updates, including eDM creation for marketing campaigns.
- Led component release training and coordination to ensure smooth deployment across staging and production environments.

Software Engineering Intern

CTC Integrated Software Engineering

March 2018 - June 2018

Completed a 3-month undergraduate trainee program where I developed a car seat demo website, built company websites using WordPress, and created a data conversion application using Microsoft FoxPro.

PROJECTS

Various websites revamp, CMS component functionality/design enhancements, Campaign-related game, eDM development, Homestay reservation app, TikTok filter
