\<PUNG KUI SIN\>

As a dedicated Web Developer with 3 years of experience, I specialize in creating robust and user-friendly websites and applications. My expertise spans frontend and backend technologies, including HTML, CSS, JavaScript, and various CMS platforms.

PROFESSIONAL EXPERIENCE

Web Developer
Germs Digital
August 2022 - Present

- Deliver a comprehensive migration project, transferring over 500 pages via CMS for one of Singapore's top three banks.
- Develop and implement features and functionalities for both new and existing websites and applications using different programming languages like React JS, Jquery, Javascript, Bootstrap and PHP.

Webmaster
Webscape Consulting
Oct 2018 - June 2022

Developed, updated websites, eDMs and new component releases, ensuring smooth integration into test and production environments.

Software Engineering Intern
CTC Integrated Software Engineering
March 2018 - June 2018

Completed 3-month undergraduate trainee program. Developed a car seat demo website, created company websites using WordPress, and utilized Microsoft FoxPro to create a data conversion application program.

PROJECTS

- Revamped and delivered a comprehensive 500-page CMS project
- Homestay reservation website and app
- Created and enhanced CMS components to improve functionality and user experience
